CORE SKILLS

Programming

Python (advanced), R, SQL, LaTeX

Generative AI & LLMs

LLMs, Prompt Engineering, RAG, Fine-Tuning, Agentic AI, Autonomous Agents, LangChain

Machine Learning & Deep Learning

TensorFlow, Keras, PyTorch, Scikit-learn, Time Series, Predictive Maintenance, Explainable AI (xAI)

NLP

Transformers, Embeddings, Text Classification, NER

Data & MLOps

ETL Pipelines, Microservices, REST APIs, Docker

Cloud

Google Cloud Platform (Vertex AI, GCP AI/ML fundamentals), Microsoft Azure AI, Azure Cognitive Services, AWS

Soft Skills

Team Leadership, Developer Relations, Public Speaking, Mentoring

LANGUAGES

Spanish
Native

English
C1 / C2 - Professional

CERTIFICATIONS

Azure AI Fundamentals (AI-900)
Microsoft

Intro to Quantum Computing
UNED

PROFESSIONAL SUMMARY

AI Engineer with over 4 years of experience turning complex concepts into real-world, production-ready AI solutions, with growing hands-on exposure to Google Cloud Platform (Vertex AI) alongside Azure and AWS. My day-to-day is focused on what I'm most passionate about: Generative AI, Large Language Models (LLMs), and autonomous agents — from prototype to production deployment.

Throughout my career, I've built end-to-end machine learning systems: from designing the data pipelines (ETLs) all the way to deploying the final microservice architectures on cloud platforms. I gained a significant part of this experience in the financial sector at Santander Group, where I learned how to build robust, scalable, and secure systems.

While my foundation is deeply rooted in computer science, statistics and data science, I don't just sit behind a screen all day. I genuinely love connecting with the community and sharing knowledge. I'm very active in developer relations and technical evangelism, whether that means speaking at conferences, leading community initiatives, or doing live public demos to make tech more accessible.

PROFESSIONAL EXPERIENCE

Santander Consumer Finance Global Services – Santander Group • Valladolid, Spain

Analyst II - AI Team

10/2025 – Present

- Lead end-to-end design and development of automated process solutions on microservices architecture, enabling scalable deployment of AI capabilities across business units.
- Design and deliver high-impact Generative AI demos and Proofs of Concept (PoCs) for executive and technical audiences, accelerating stakeholder buy-in.
- Drive internal developer relations (DevRel) initiatives: evangelize GenAI best practices, produce technical showcases, and present live demos.
- Manage team resources and mentor junior analysts on AI solution design.

Analyst I - AI Team & Junior Data Analyst

09/2023 – 09/2025

- Developed and deployed Generative AI and LLM-based solutions for financial services use cases, including LLM-powered autonomous agents automating knowledge-intensive workflows.
- Built data pipelines and ETL processes supporting analytics and ML workloads across the organization.
- Developed internal Python libraries and tooling, improving developer productivity and code reusability across teams.

AIR Institute • Valladolid, Spain

AI Researcher

02/2022 – 08/2023

- Researched and implemented Generative AI and LLM solutions, contributing to early-stage adoption of transformer architectures in applied research projects.
- Built and interpreted ML models spanning Explainable AI (xAI), time series forecasting, and predictive maintenance.
- Implemented NLP algorithms for text understanding and classification.

EDUCATION

MSc in Data Science

Universitat Oberta de Catalunya (UOC) • EQF Level 7

BEng in Computer Engineering

University of Valladolid, Spain • EQF Level 6

BSc Statistics

University of Valladolid, Spain • EQF Level 6

High School Program of Excellence in Science

IES Diego de Praves, Valladolid, Spain • EQF Level 5

COMMUNITY & VOLUNTEERING

Google Developer Group Valladolid - Organizer & speaker • Feb 2023 - Present

Young Programmers Club - Python Instructor (ages 12-18, Informatics Olympiads preparation) • Oct 2022 - Present

Google Developer Student Club - Lead • 2021 - 2023
